

To strengthen our team in the area of CNC production, we are looking for

## **CUTTING MACHINE OPERATOR (M/W/D)**

Specialising in milling technology

### **Your tasks**

- Mechanical production of tool components with high precision
- Operating and setting up CNC 3-axis / 5-axis milling machines
- Optimising the programs on the processing machines
- Carrying out simple maintenance work on the machines

### **Your profile**

- Completed training as a cutting machine operator (m/f/d), ideally specialising in milling technology
- Ideally, you have several years of professional experience in the field of milling technology
- Knowledge of programming (ideally Siemens control)
- Independent, goal-oriented and structured working style with a high degree of quality awareness
- Motivation, ability to work in a team, reliability and flexibility
- Willingness to work in shifts (2-shift system)

### **We offer you**

- Challenging work in a family atmosphere
- Financial security through a permanent contract and good, performance-related pay
- Holiday and Christmas bonuses as well as capital-forming benefits
- A future-orientated, varied and secure job in an innovative company
- 30 days' annual leave, additional benefits such as holiday and Christmas bonuses, company events, offers for subsidised company pension schemes, bicycle leasing and much more

Are you interested? Then we look forward to receiving your informative online application.
